

SIMPLY CLEVER

**Škoda**Roomster

**There's a whole other world out there. It's a world full of light and space.** It's a world of broader horizons and fresher perspectives. It's a world where there's room to think and room to breathe. It's a world where there's room to live. The adventure begins long before you arrive. It begins when you set out on the journey. Are you ready to take that first step? Are you ready to find your own room?

## PERSPECTIVES & DESIGN

**Can you combine the stylish with the practical? Can you design for the everyday and still produce a car that's distinctive and filled with character?** Can passengers have their comfort and drivers have their fun? These were the questions Škoda's engineers asked themselves, and the Roomster is the answer to them. From these simple considerations has come a car that is built around you and your needs. One that relishes every challenge that comes its way. It's a design philosophy we call "Room For Life" and it's resulted in a car that has more than enough room for yours.

1.

2.

3.

## “Enjoy a new perspective”

**1. The raised cinema seating in the rear** is the best place to enjoy a unique view of the world. Ease back and lose yourself in the panoramic views and experience those magic moments when life unfolds before you like a movie.

**2. Extra large side windows** make the interior look more spacious, giving the rear seat passengers an unrestricted view of the world fleeing by.

**3. The new concept of the Roomster model** provides a unique solution to the spacious interior with regard to originality as well as to your needs and wants. Things are different in the world of the Roomster. Everywhere you turn, there's a fresh angle, a different slant, an unexpected twist. Take another look. You'll be surprised by what you find.

**4. The panoramic roof** is made of laminated glass, which prevents excessive heat inside the car while also protecting you from ultraviolet rays. The 0.82m<sup>2</sup> glass area amplifies the feel of airiness and spaciousness. If needed, the entire glass area can be shaded from inside using two roller blinds.

4.

1.

2.

3.

4.

## “A design for life”

**1. The front headlamps and fog lamps** give the car an amiable appearance. Thanks to the smooth transition between the lamp and the bumper, the car's front is totally compact.

**2. The front grille** with vertical bars and Skoda logo is not only a traditional feature but also a typical mark of all Škoda cars currently manufactured. The Roomster is no exception as it self-assuredly acknowledges its heritage.

**3. Rear door handles** are integrated into the dark window columns, so the car's design stays undisturbed.

**The lengthwise roof railing**, which accentuates the car's attractive curves, is available either in elegant black or in exclusive silver (see page 29).

**4. Rear lights** are positioned high in the window columns. This solution is both eye-catching in terms of design and useful in

terms of the maximum possible size of the rear door. The “C” shape of the tail light, typical of Škoda cars, is included in the Roomster as well.

Little and big boys alike collect model cars. This is why we have the Roomster available for you (scale 1 : 43) in various colours.

## TECHNOLOGY

**"Room For Life" also means room for modern technology.** It ensures that a stylish vehicle is no less practical, comfortable and safe for everyday use. There is technology behind almost every detail, enabling perfect functionality throughout and the solid performance of the car as a whole.

## “Real life technology”

**1. The High-line instrument panel** features 4 analogue indicators, 19 indicator lights, segment display (distance travelled, time) and a large Maxi DOT display showing data from the on-board computer such as outdoor temperature, fuel consumption and mileage. The Maxi DOT further displays easily legible information on fuel reserve, oil pressure, cooling liquid level etc. The advantages of the Maxi DOT include the ability to communicate information from the radio, telephone and navigation system.

**2. Cruise control** will be welcome equipment for drivers who often take long trips on motorways. Controlling it is easy: when you are driving at a speed that you wish to maintain, just set it with a light touch of your finger on a little lever beneath the steering wheel.

**3. The control module beneath the steering wheel** is designed for simple control of the main functions of the car radio and mobile phone. This innovation both increases the driver's comfort and contributes to overall driving safety.

**4. An audio jack** will let you use your iPod, CD or MP3 player, walkman, DVD player or PDA in your car. You will get it with every Beat or Dance radio.

**5. The GSM phone preparation** is available in both traditional wired and wireless Bluetooth versions, either with an adapter and a holder or without a holder. Mobile phone adapters are included in the Škoda Genuine Accessories.

**6. The navigation system** with dynamic TMC module, featuring monochromatic display with green backlight, enables reception of traffic information en route and adjustment of the planned route accordingly. It provides both vocal and graphical instructions. The navigation system includes an RDS-equipped AM/FM receiver, CD and MP3 player, connection to a CD changer as well as input jack for the mobile phone hands-free set.

**7. The 1.6 16V/77 kW** is the most powerful petrol engine designed for the Roomster. Its properties will suit all drivers who require a sufficiently powerful engine in all circumstances. Other available petrol engines include the 1.2 HTP/51 kW and 1.4 16V/63 kW.

**8. The 1.9 TDI PD/77 kW** engine is the top-of-the-range diesel engine for the Roomster. It is also available with a DPF (Diesel Particulate Filter). You can also select

one of two available 3-cylinder diesel engines: the 1.4 TDI/51 kW or 1.4 TDI/59 kW.

**9. Automatic transmission** is available for the 1.6 16V/77 kW petrol engine version.

Even the car for the youngest drivers, the Bobby car, offers a great driving experience. It's no wonder, it's a Roomster after all.

## SAFETY

**Getting the most out of life isn't just about the desire for more.** It's also about a feeling of security, a confidence that something solid and reliable is behind you, protecting you and looking after your best interests. That's why Škoda engineers make safety their number one design priority. Because a car doesn't just carry your shopping and luggage – it carries everything that's most precious in your life.

## “Safer living”

**1. Driver and passenger airbags** are one of the basic elements of safety equipment. Driver airbag comes as standard worldwide, passenger airbag in the EU only.

**2. Side airbags** are conveniently concealed in the backrests of the front seats and protect the driver and passenger in the event of a side collision.

**3. Head airbags**, which protect passengers sitting in front as well as in the rear seats, will be required

by those who don't leave anything to chance.

**4. Child seats**, available from Škoda Genuine Accessories, have passed safety tests with flying colours so they are highly recommended.

**5. The VIN plate** (Vehicle Identification Number) includes the body number and serves to identify the car. It's placed at the edge of the windscreen together with a bar code which can be retrieved using a special scanning device.

**6. Rear parking sensors** provide very useful assistance to those who often park in cities.

**7. Front fog lamps with the Corner function** will come in very handy when turning on unlit junctions or parking in the dark where there is a danger of damaging the body or wheels on the kerb.

**8. The Corner function** means that the left or right fog lamp turns on automatically depending

on the steering wheel position and side indicators. It is activated when manoeuvring with the car at speeds of up to 40 kph with the headlamps switched on.

**9. The Electronic Stability Programme (ESP)** stabilises the car when negotiating a bend and counters the tendency to skid. **The Anti-Slip Regulation (ASR)** prevents the driven axle wheels from slipping when accelerating or driving on a wet or icy surface.

**10. and 11. Passenger airbag deactivation** is an essential feature for all who wish to have their child in a front passenger side child seat.

**12. Locking the car from the inside** using the central lock protects your possessions from theft when stopping at traffic lights or while driving slowly through heavy traffic. The door locks disengage after pressing the control button or by opening the driver door.

**13. Interior monitoring deactivation** is a practical feature for cars equipped with an alarm.

**14. Tyre Pressure Monitoring (TPM)** works together with the ABS sensors, as an under-inflated tyre has a different revolution speed. A control light on the instrument panel as well as an acoustic alarm warn the driver of the discrepancy.

## COMFORT

**It's the end of a long day. Or the beginning of a long journey. You need a place to rest, recuperate, and clear your mind.** In today's world, the car has become that oasis – your chance to relax, be happy and make time for yourself. That's why, beyond its absolute practicality and reliability, the Roomster is all about delivering that comfort and reassurance, as well as delivering you to your destination with a smile on your face.

## “A new world of comfort”

**1. Your “Driving Room”** is designed in such a way that you have all necessary controls at your fingertips and can concentrate fully on driving. The dashboard is attractive while still simple and easy to navigate.

**2. The rear grab handles** with coat hooks, located on both the left and right sides, are included in the Overhead 1 package.

**3. Make-up mirrors** are placed in the sun shields of both the driver and front passenger.

**4. The sunglasses compartment** is recommended to those who want their glasses always at hand.

**5. Storage compartments** on the passenger side are provided in various designs as either open or covered, depending on the equipment version. The lower lockable box can serve as a small refrigerator in combination with the Climatronic air conditioning.

**6. The central console drinks holder** is a welcome addition for the rear seat

passengers, easily accessible for the front seat passengers as well.

**7. A 1.5l bottle holder** is included in the storage compartments on both the driver and passenger door panelling.

**8. Electric front and rear windows** mean greater convenience, as well as utility and safety. The rear windows can be equipped with a child safety lock, preventing undesired use by your little passengers in the back.

**9. An adjustable armrest** between the front seats houses a 1.2l storage compartment.

**10. Foldable table on rear centre armrest with a drinks holder** increases the rear passengers’ level of comfort.

**11. Electrically-adjustable heated external mirrors** are a matter of both safety and comfort. The controller is conveniently near the driver’s left hand, making proper function of the mirrors effortless.

**12. A 6-CD changer** is conveniently stowed under the storage compartment at the bottom of the dashboard facing the front passenger seat.

**13. The height-adjustable front seats** enable the driver and front passenger to adjust the seats to the most optimum position.

**14. Drawers with tilting lids** situated under the front seats provide storage space for small objects.

**15. The folding hook**, located on either side of the luggage compartment, is a detail enhancing the car’s functionality.

**Heated front seats** are for all those who wish to indulge in extra comfort.

4.

5.

6.

7.

## “Find your own room”

**1., 2. and 3. The VarioFlex rear seating system** gives the Roomster unrivalled interior flexibility. The system is based on three separate rear seats that can be handled independently of each other. You can change their position or remove any or all of them. In their basic position the side seats can be moved 80 mm forwards or 70 mm backwards. When the middle seat is removed, the two side seats can be moved 110 mm towards the centre. A single person can do all this without any tools.

**4. The mid-level luggage compartment floor** places the bottom of the luggage compartment on the level of the loading edge, facilitating easier luggage handling. In addition, the place underneath the floor is a perfect place to keep things that you want to carry with you without unloading them every day.

**5. The flexible partition net in the luggage compartment** can be used to fix various objects. It's a part of the storage package which also includes storage pockets in the rear side door panelling and two open storage compartments above the rear wheel arches.

**6. A set of nets in the luggage compartment** will help you always keep the car tidy. The nets will prevent movement of, and possible damage to, the transported luggage. It is available as an optional extra or from Skoda Genuine Accessories.

**7. The dividing net**, used to separate the cabin from the luggage compartment, is usually fixed to the rear seats. It can be fixed behind the front seats if needed. The passengers' comfort and practicality of the vehicle are further increased by the **2-position luggage compartment cover**. The benefit of the lower position is that it allows the transport of objects that would otherwise impede the driver's view.

The VarioFlex rear seating system diagram shows all eight interior layout options.

## EQUIPMENT

**Your Roomster is much more than just a tool to help you live your life.** It's also an expression of your taste and personality. Colours, accessories, extras – they're all there for you to mix, match and create the perfect blend for you. Life may be full of decisions, but these are ones to enjoy.

## Škoda Genuine Accessories

1.

2.

3.

4.

5.

### "Gear up for the long trip"

Škoda Genuine Accessories will let you underline the uniqueness of your car while adjusting it to your particular lifestyle. These accessories serve to expand the standard and extra equipment. We offer you various products that increase your vehicle's comfort as well as utility value ranging from sunblinds through phone adapters to an interior holder for two bicycles. You can obtain further information on the complete range of Škoda Genuine Accessories at any authorised Škoda partner.

**1. Roof transportation systems** enable you to safely carry bicycles, surfboards, skis or snowboards as well as roof boxes. They consist of a modular roof rack to which other carriers/holders can be fitted.

**2. With a tow bar**, which is of course removable, your Roomster can pull a trailer weighing up to 1,200 kg, depending on the engine version. It is also available as an optional extra.

**3. The door sill covers** with stainless steel inserts

are intended for those who wish to underpin their car's elegance. In addition to their aesthetic functionality, they prevent damage to the door sills.

**4. The portable MIO Moov navigation system** is a unique integrated solution with a holder on the dashboard which also enables recharging during the drive. The solution successfully passed the Euro NCAP crash test.

**5. The Mole with a storage pocket** will please most the small passengers.

1.

3.

2.

4.

## Roomster Scout

**The Scout badge** placed on the rear of the vehicle symbolises the individuality of the car as well as that of its driver.

**1. The front bumper spoiler** sets the Roomster Scout apart from the crowd. The more robust front also protects the car while driving on bumpy roads. **Front fog lamps** in the original Corner design can be equipped with Corner functionality for extra safety (see page 17).

**2. The interior** of the Scout is upholstered in Onyx material as part of the car's standard equipment or you can decide to go for the optional exclusive Floss interior in combination of leather/artificial leather/fabric. The dashboard is available in two designs: Onyx-Onyx or Onyx-Silver-grey.

**3. The interior bicycle holder** will primarily enchant sports lovers. If the rear seats are removed, two bicycles can be safely transported. The bicycle holder is available

for all Roomster versions.

**4. 5-spoke alloy wheels** were developed specially for the Roomster Scout and are available in two sizes: 6.5J x 16" **Arktos** and 7J x 17" **Kentaur**.

You can find more detailed information on equipment, technical specifications and prices at your authorised Skoda partner or in the Škoda Roomster Scout catalogue.

# General information

## ŠKODA SERVICE

Put your car in good hands. We give you good reasons to choose an authorised Škoda service partner.

### We offer you first-class quality

Your car requires advanced technology. For this reason, all the Škoda authorised service partners have special tools and quality diagnostic systems at their disposal that in combination with the technological procedures prescribed by the manufacturer ensure the perfect functionality and reliability of your car.

### Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in the car requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the staff of the authorised service establishments in order to provide them with state-of-the-art information important for their activities.

### Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is of great importance to us in the same manner as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control of the provided services.

### Comprehensive range of services:

#### • Service inspections

For your car to remain in top condition and functional for a long time and, optionally, not to forfeit warranty, it is essential for your Škoda authorised service partner to perform regular service inspections. The service schedule informs you about when the service inspection must be done.

#### • Body and paintwork service

Damage to the body and painted areas following an accident will be fixed by your authorised Škoda service partner in an expert manner, in accordance with information from the manufacturer, using Škoda Genuine Parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

#### • Courtesy car

The authorised Škoda service partner can provide you with a courtesy car for the period of repair or service inspection.

#### • Pick-up and delivery service

If you are unable to take your vehicle to a Škoda service, an authorised Škoda service partner will arrange a date with you to pick up the car. The car will be delivered back after the service work has been completed.

The listed services represent only a part of the wide range of Škoda service offers. The offer may vary from country to country. Please contact your authorised Škoda service partner for further details and information on the range and specific conditions of services they offer.

## ŠKODA GENUINE ACCESSORIES

Genuine accessories make every vehicle unique, giving it its own style. The Škoda Roomster comes with very extensive standard equipment, however, some of the additional items can only be purchased as Škoda Genuine Accessories. These items include, for example, child safety seats, roof rails, mobile phone adapters and alloy wheels. The extra equipment offer also extends to mechanical security items and a whole series of items increasing the vehicle's utility value and individuality. Our catalogue of Roomster equipment contains more detailed information on the Škoda Genuine Accessories range.

## ŠKODA GENUINE PARTS

Škoda Genuine Parts are identical to those used during the assembly of Škoda vehicles. The vehicle manufacturer knows best which part is intended for which functionality and the required parameters it needs to meet unconditionally for the car to function properly.

### Safety

Every vehicle component and part has its own purpose and some of them directly determine the safety of the car's occupants. Our care for safety is proven in, for

example, body structure, airbags, safety belts and most importantly in the brake system. The lives of the people in and around the car depend on the quality and operating efficiency of the brakes, especially under extreme conditions.

### Availability

Škoda Auto offers a comprehensive range of parts and equipment items that are used in the vehicle's production, and does not merely focus on high-turnover parts. The supply of Škoda Genuine Parts is provided even after the relevant vehicle model is discontinued, and not just for the period specified by law: indispensable components for the operation of the car are supplied to the market for at least 15 years after the discontinuation, car equipment components are supplied to the market for at least 10 years after the discontinuation and components of door lining and carpets are supplied to the market for at least 8 years after the discontinuation.

### Top quality

To verify quality parameters, the development department maintains an extensive testing facility including a test circuit with extreme polar and desert conditions, as well as material testing laboratories of the quality control department. Thanks to the use of first-rate materials and technologies, Škoda Genuine Parts ensure safe and carefree driving. Precise alignment guarantees replacement of worn parts without unnecessary complications.

### Long life

The use of first-rate materials and production technologies in the manufacture of Škoda Genuine Parts ensure their maximum reliability and long life.

### Original technical solutions

The knowledge gained in production and operation is continuously reflected in the search for new technical solutions aimed at obtaining a truly first-rate product, which will meet the customer's requirements.

### Legislative requirements and certification

All Škoda Genuine Parts meet the legislative requirements and are approved by Škoda Auto on the basis of meeting stringent criteria. This way the customer obtains a guarantee that the components installed in their vehicle will be reliable, functional and safe.

### Protection of the environment

The Škoda Genuine Parts range includes exchange parts whose production does not burden the environment with waste, excess heat and water pollution to a high degree. Returned parts and aggregates are not discarded but modified for re-use, thus re-utilising a great part of the work and energy invested in the parts during their manufacture.

## INFORMATION ON THE INTERNET

Information is available at [www.skoda-auto.com](http://www.skoda-auto.com) to assist you in deciding which vehicle suits your needs thanks to the detailed descriptions and photographs of all our models. Our configuration programme will let you try various combinations of standard equipment, engine, paint colour, interior and extra equipment to make sure your new vehicle accurately meets your requirements. This programme will also assist you with the calculation of optimum monthly payments for vehicle financing and the selection of a suitable dealer.

## ŠKODA FINANCE

If you select a Škoda Roomster vehicle, ŠkoFIN will assist you with financing it. The ŠkoFIN company offers programmes both for individuals and legal entities. Our Škoda Finance brand product line offers both lease and loan financing. You can contact one of our authorised Škoda partners to arrange and sign an agreement and to learn more about our product offer or the convenient special offers from ŠkoFIN. These are time limited, however, they bring very unique and interesting benefits.

## FLEET SALES

Whether your car fleet is small or large or whether you are a customer from the business or public sector, Škoda Auto and its authorised dealer network are here for you. We offer products and services tailored to your business and financial needs, including top-quality customer care, a portfolio of services corresponding to the specific requirements of corporate customers and a high quality of cars, accessories and maintenance services, which are a guarantee of low operating and ownership costs of your car fleet.

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of responsibility for, and attempts at, the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes

(including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
