# Enyaq Selection 60/85: Key equipment

## SAFETY

Side Assist – blind spot monitoring system

Crew protect assist

Driver monitoring system

One pedal driving technology

Mobile digital key incl. 2x physical keys

Adaptive lane assist incl. emergency assist

iSOFIX child seat anchor points

Anti theft alarm

Turn assist incl. cross road assist

Tyre pressure monitoring system

Front side airbags with curtain airbag

Driver & front passenger airbags

Front assist: Forward collision warning incl. emergency brake & pedestrian recognition

## FUNCTIONAL

Climatronic 3-zone air conditioning

Predictive cruise control incl. traffic jam assist

Kessy Full – keyless entry/go system

Front & Rear parking sensors

Rear view camera

Adaptive cruise control

Drive mode select

Virtual pedal – electric tailgate

Power folding exterior mirrors

Automatic rain & light sensors

Auto-dimming rear view mirror

Wireless charging ring (subject to device compatibility)

Vehicle to load (V2L) readiness (adaptor required)

21 litre front trunk

Infotainment pack:

- 13" touchscreen display
- Navigation system
- Bluetooth & Voice control
- Smartlink (Apple Carplay / Android Auto)
- 2x USB-C ports & 8 speakers
- Online services (10-years subscription)
- 10GB monthly data pack (3-year subscription)

## INTERIOR

'Suite' design selection leather upholstery

Heated front seats

Ventilated front seats

Front centre armrest

Split folding rear seats incl. rear centre armrest

Front & rear floor mats

Storage compartment in boot

Leather heated steering wheel (2-spoke)

LED interior pack:

- LED ambient lighting
- LED front footwell lights
- 'Welcome' style logo projection within door

## EXTERIOR

20" 'Vega' silver alloy wheels

LED headlights

LED tail lights

'SUNSET' dark tinted privacy glass

Chrome window surrounds

Chrome roof rails

Tech deck front grill

# Enyaq Sportline 85/85X: Key equipment

# Battery & Charging

An electric vehicle's power is not determined solely by the power of the electric motor itself, but also by the power that the battery is able to deliver. As such, the value cited for the car's power is determined by the entire drive system.

| Battery    | DC charging power | System power output* |
|------------|-------------------|----------------------|
| 59 kWh     | 105 kW            | 140 kW               |
| 82 kWh     | 165 kW            | 210 kW               |
| 82kWh - RS | 165 kW            | 250 kW               |

\*The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

Electric vehicles can be charged at public charging stations much like you would refuel a normal car at a petrol station. These charging stations are powerful so they can recharge vehicle's batteries rapidly. Most users, however, will generally use a home charger – a Wall box – or an ordinary power socket. This charging takes longer, but hooking up to the grid is an automatic process and you can charge the batteries overnight, or at any time you are not using the car, without having to be present.

| Source            | Charging                                 | 60                      | 85                      | 85X                     | RS                      | Cable                             |
|-------------------|--|-------------------------|-------------------------|-------------------------|-------------------------|-----------------------------------|
| Home socket       | Charging power<br>Charging time (0-100%) | Max 2.3 kW<br>>24 hours | Max 2.3 kW<br>>24 hours | Max 2.3 kW<br>>24 hours | Max 2.3 kW<br>>24 hours | Mode 2                            |
| Wallbox (3-phase) | Charging power<br>Charging time (0-100%) | Max 11 kW<br>6.30 hours | Max 11 kW<br>8.30 hours | Max 11 kW<br>8.30 hours | Max 11 kW<br>8.30 hours | Mode 3                            |

- All charge times are average and can vary depending on certain conditions, such as temperature and power supply available.

# Škoda EV Plan: €1,250 optional addition

The new Škoda Enyaq uses the latest materials and technologies that requires expert skills and knowledge when it comes to maintenance and care. For your convenience we have compiled a Škoda EV Plan to provide up to 39% savings when compared to purchasing the services and components separately. See below for what is included in the Škoda EV Plan.

**Routine Inspection 1 & 2** comprises of Electronic Health Checks to ensure your vehicle is free from faults and functioning correctly.

**Service Interval Maintenance** High voltage component checks, Brake Fluid Change, Pollen Filter Replacement and a Coolant refill are the main tasks carried out by technicians during this service.

**4 Low Rolling Resistance Tyres** provide better battery range and low cabin noise levels. They are likely to be the most expensive operating cost you will experience during the lifetime of the vehicle.

**Brake Pads** may require replacement during the Service Interval or if the vehicle signals the driver on the infotainment display.

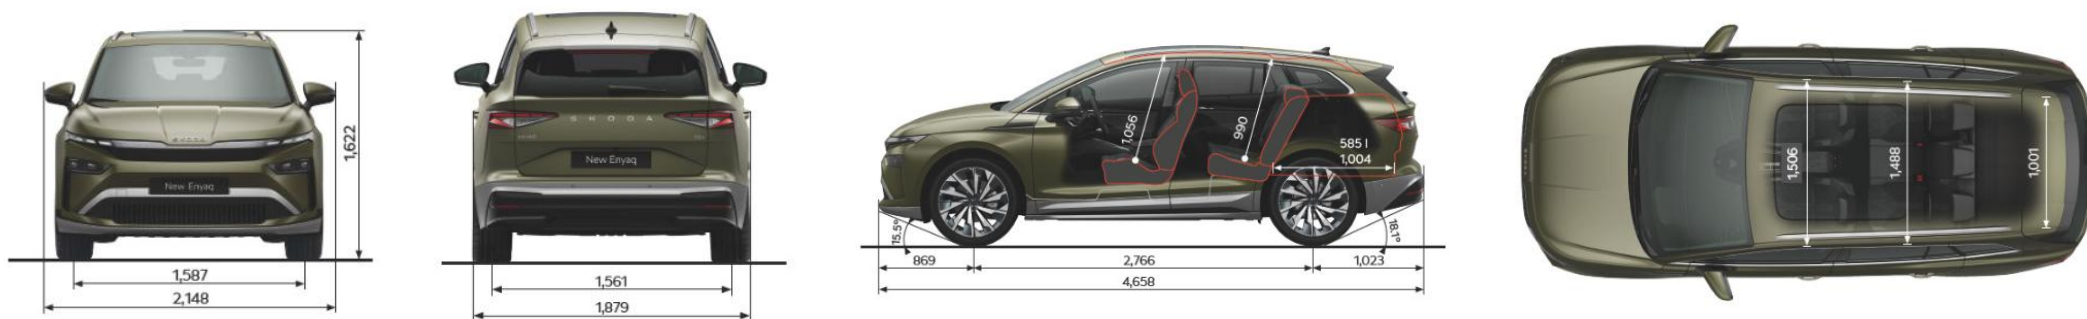

**Wiper Blades** ensure maximum visibility and safety. A set of wiper blades is included in the Tyre & Maintenance Plan.

**Tyre and Maintenance Plan Summary:** Replacement Tyres - As required €1,250, Mode 2 Charging Cable for backup/domestic charging (supplied at delivery) -€274, Inspection 1 & 2 - Electronic Vehicle Health Check, Functionality and Fault Assessment -€70, Routine Service Maintenance - High Voltage Component Check, Running Gear Assessment, High Voltage Battery Status, Brake Fluid Change, Pollen Filter Replacement, Top-up Cooling System Levels- €209, Brake Pad Replacement - As required-€175, Wiper Blade Replacement - As required -€96. Total value if purchased separately €2,064. As part of Škoda EV Plan €1,250 (saving of 39%). Price based on component recommended retail price and average dealer labour rates. Tyre prices are based on 21" Self Sealing Technology. Please discuss your Škoda EV Plan requirements with your local ŠKODA Dealer.

\*Maximum electrical output of 250kW and 210kW (85x & 85x Sportline) can be accessed for a maximum of 10 seconds, calculated in accordance with UN GTR.21. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. The availability of the maximum power requires the high-voltage battery to be between 23°C and 50°C and have a charge level of > 88%. Deviations from the aforementioned parameters in particular may lead to a reduction in power, through to the complete unavailability of the maximum power. To maintain the high-voltage battery's usable capacity as effectively as possible, a battery charging target of 80% is recommended if the vehicle is used daily (to be switched to 100% prior to long-distance journeys for example). With other engine-battery variants, the availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.
