### Holds and lasts

Did you know that the textile floor mats from ŠKODA Genuine Accessories also undergo the so-called 'heel test'? This test simulates the action of the driver's foot on the accelerator, sinking the heel 5 mm into the floor mat in both dry and wet conditions at an angle of 45°.

The floor mats also undergo an additional load test in the form of a long driving test, and further focus is placed on the brackets fixing the front floor mats to the car upholstery. The tests are designed to verify the proper clip strength needed to enable comfortable handling by the driver, while keeping the floor mat in place despite the occasional application of force during the drive.

Simulation map of stress induced by roof rack tightening

The racks undergo a number of demanding tests. Their resistance to corrosion, loading capacity, strength and durability are tested in various conditions, as well as the subsequent water tightness of the car after their installation. During the so called City Crash test, a rack loaded with 90 kg must remain on the car body under a force of approximately 12 G lasting for 50 milliseconds (impact simulation).

Do you want to ensure the maximum safety of your children in the car?

The child seats from ŠKODA Genuine Accessories with mounting options for transporting against the direction of travel, comfort and variability, represent the best solution for transporting the smallest passengers.

#### Practical and variable

The intelligent design of these child seats allows the child to not only be seated in the back, but also on the front passenger's seat where you can see them. The child seats feature variability and numerous setting options to adapt them to the changing size of your children.

#### Perfectly verified

All child seats from ŠKODA Genuine Accessories comply with European safety regulations (EHK 44.04) and have passed a number of other tests. The high quality and safety of these child seats is demonstrated by their excellent results in the Euro NCAP impact test, together with successful non-combustibility testing, harmful substance ratings and cover quality.
